

Every Step I Made

The Equals

I never came to say hello
Because I thought I'd spoil your show
I tried my best not to be seen
But you noticed me

I couldn't find a reason why
A stupid song should make me cry
But it brought back some memories
And I was paralyzed

From then on, every step I made
And every line and every phrase of your song
Made me realize I was on my way
Going out of your heart baby
You could make the past to show me
Pictures of our love that used to be, no no no

I wondered if there was a chance
That we could have just one more dance
Should I be brave or should I just
Leave and call it a day

But suddenly it came to me
I should explain just what you'd seen
They called the blame just like a man
Asked for another chance

From then on, every step I made
And every line and every phrase of your song
Made me realize I was on my way
Going out of your heart baby
You could make the past to show me
Pictures of our love that used to be, no no no

From then on, every step I made
And every line and every phrase of your song
Made me realize I was on my way
Going out of your heart baby
You could make the past to show me
Pictures of our love that used to be

From then on, every step I made
And every line and every phrase of your song
Made me realize I was on my way
Every step I made...
