

Baby

The Expendables

Hey, baby, baby, baby, baby
Why don't you come and sit down next to me?
All I need is some loving from you, girl
'Cause it's so lonely at sea

Me and my crew, we've been out here since June
Bearing heat and rain
So, my baby, won't ya stay here awhile
And help ease the strain

Don't you think about them second thoughts
Rolling round in your head
I ain't exactly what you think I am
So get to know me, instead
I know it's weird in here
My babe, this is the show
Why don't you stay a while?

Stay until I go
Stay until I go
Stay until I go

I know you hate the way they make it sound
Like your pride is undone
And don't ya worry, there's no jury with me, girl
Just me and my heart all alone

Don't you think about them second thoughts
Rolling round in your head
I ain't exactly what you think I am
So get to know me, instead
I know it's wired in here
My babe, this is the show
Why don't you stay a while?
Stay until I go
Stay until I go
Stay until I go
