

Starry Night

The Expendables

Starry night
Opens up and eats me alive
Ocean looks like puddles next to the sky
I can't believe my eyes
It's alright
When it's just you and I
Starry night

Starry night
I feel so small beside your glow
And take me from this place into the unknown
Where I can feel at home underneath your lights
I will be reborn starry night

Starry night
Always by my side
Keeping me company thru tough times
Starry night
Always by my side
Keeping me company thru tough times

Starry night night night
You know whats inside of my head
But you know everything when nothing is said
So I will ask again
Did you start this life?
Or you will leave us dead?
Starry night

Starry night
Always by my side
Keeping me company thru tough times

Starry night
Always by my side
Keeping me company thru tough times
Starry night
Always by my side
Keeping me company thru tough times
Starry night
Oh always by my side
Keeping me company thru tough times

Your emptiness is colder than a stone
Stars are like sand in the sky
I will never be alone
Never be alone
Never be alone
Never be alone
I never be alone

Starry night
Always by my side
Starry night
Always by my side
Starry night
Always by my side

Keeping me company thru tough times
Starry night
Always by my side
Keeping me company thru tough times
Starry night
Always by my side
Keeping me company thru tough times
Starry night
Oh always by my side
Keeping me company thru tough times
