

Accelerated Evolution

The Faceless

An origin wreathed in darkness
Generated from the primordial storm
Thought is awakened in animalian form
Phenomenon breathes to pull forth infinity
A vibrational frequency
The labyrinth inside the elusive mind's eye
Measuring the intervals
Decoding the circuitry disguised
Cognizance expands and perpetuates
Don't be afraid to collapse into yourself
Vibrations pulsate
A molecular fate
Biology becoming indeterminably intertwined
With it's own accelerated evolution
We forge
We're growing
Biology becoming indeterminably intertwined
With a universe propelled in a turbulent design
A framework overflowing with life
In another step of evolution
Humanity moving beyond mortality
Endless sensation revealed in a spectrum of light
Phenomenon breathes to pull forth infinity
Restructured elemental design
A birth and a merging of minds
A perceptual gaze dismantling the limitations of time
Cognizance expands and perpetuates
My skeleton rearranges itself beneath the surface of my
skin
Don't be afraid to collapse into yourself
Vibrations pulsate
A molecular fate
Biology becoming indeterminably intertwined
With it's own accelerated evolution
We forge
We're growing
Biology becoming indeterminably intertwined
With a universe propelled in a turbulent design
A framework overflowing with life
