

A-U.K.

The Faction

A little island way far away
That's loved and admired in the U.S.A.
England's scene is cool for them
But here it just creates a bunch of problems
People here wear circle A's
Right beside it the flag of the U.K.
Circle A no government that's quite clear
So what's the Union Jack still doing there?
A-U.K. means anti-U.K.
United Kingdom go away
Remember you live in the U.S.A.
England's stale anyway
I don't care what Wattie says
Fuck the U.K. that's what I say
They're just jealous they can't see
What in the world is the S.P.G?
Dump on the Irish for 800 years
Can't they see they're not wanted there?
Australian fields red with blood
Their English masters had to have guns
Their scene's divided by the punks and skins
We are united, always will
Phoney division made by our underground press
That we too are divided and we're in distress
Some English groups aren't even bands
They sound like a bunch of pots and pans
Cry about a war that doesn't exist
Americans are hated, we still persist.
