

The Alchemist

The FAIM

Black eye and afraid of love
Was in pieces on the floor till you came around and stitched me
up

'Cause you took this lead, turned it into gold
You took my heart and made it whole
You created diamond from a stone (Oh)

You make December feel like the summer
When I'm with you, you turn my blue a warmer colour
You take my weather and make it better
When I'm with you, it's like we're two birds of a feather
I was a lonely drifter gone with the wind, girl
Never saw a life like this
You make December feel like the summer
Oh, you showed me that love exists
You're the alchemist

New eyes and an open door
Dive into your mind, free falling, never hit the floor

'Cause you took this lead, turned it into gold
You took my heart and made it whole
You created diamond from a stone (Oh)

You make December feel like the summer
When I'm with you, you turn my blue a warmer colour
You take my weather and make it better
When I'm with you, it's like we're two birds of a feather
I was a lonely drifter gone with the wind, girl
Never saw a life like this
You make December feel like the summer
Oh, you showed me that love exists
You're the alchemist
