

No one ever looks when you make a sound
Playing your guitar on the underground
Never let them get your resistance down
'Cause you got a dream and it's not for those
With their refrigerated lunch and the [?]
But soon you'll be the one with a place to go

You could be mine
And baby if you want to you could be mine
And you could say bye
But you're breaking my heart at the very same time
You could be mine
And baby if you want to you could be mine
Everybody wants to be a superstar
But you already are

How could I forget you're just a child
With a belly full of fear and your eyes so wild
With a head full of dreams that never cramp your style
'Cause everybody wants to be adored
No one ever wants to be ignored
Hands up if you want to be a superstar
You already are

You could be mine
And baby if you want to you could be mine
And you could say bye
But you're breaking my heart at the very same time
You could be mine
And baby if you want to you could be mine
Everybody wants to be a superstar
But you already are

Oh I don't know where you belong
And I don't know who you become
But if your hearts still beats like a drum
And your words come for real when they come

You could be mine
And baby if you want to you could be mine
And you could say bye
But you're breaking my heart at the very same time
You could be mine
And baby if you want to you could be mine
And you could say bye
But you're breaking my heart...
You could be mine
And baby if you want to you could be mine
No one ever wants to be alone
No one ever wants to be alone
Everybody wants to be a superstar
But you already are
