Part 1

Been around for a while, grown my beard, I'm still a child

Deadends, shortcuts, just the same, I'm the master of my game

Predictable, now you may say, the Danny Kaye of present day

Close my hand, wave my wand, the brainchild of your wonderland

Now, I'm at the peak, never forget what I tell you Never give in to the big sleep, fast becoming Now, I'm at the edge, never reject what I offer Never believe what they tell you, let's move a mountain...!!!

Watch me fight, now watch me bleed on the universal spiral scene

The progress lingers, thoughts of man, take it as far as humans can

Now think of me your solid dream, catch me floating down the river $% \left(1\right) =\left(1\right) +\left(1\right)$

 $\ensuremath{\text{I'm}}$ an island drifting by and time again your sole forgiver

Now, I am the sun, I am the first day of summer Never give in to the dark deep, fast becoming Now, I am the moon, I am the end of tunnel Never believe in the dark ages, let's move a mountain...!!

Call me ageless, call me ghost, the diamond duke behind the shades

The sunflower beneath the skyline swaying in the land of snakes

Hey, I used to be a king, now I'm just a king of laughter

Put my faith in anything

Anything that's close to wonder

Anything that's close to wonder!!

I'm in the middle, now see what I've done, staring into the sun $% \left(1\right) =\left(1\right) ^{2}$

You think you're drowning, but slowly you slip thru the grinders of time

Afternoon in the upstreams, begging for time Humming the words "I feed you my colorful shrine"

I'm in the middle, hold on to what's mine, in the limbo of time $\$

You think you're dreaming, but gradually you learn what it's like to be torn

I'm on the other side painting skies to the poor $\mbox{Humming the words "I'll join you, we'll break down the scores.}$

She came from the islands, seen places afar

They said she was gifted, reading the stars And though I'm certain she's tellin' the truth She'd faint when the mob start rockin' the boat

In time our eyes will open, the curtains will drop To see we are one, this one that we are In time your eyes will open, time will tell "Larger than life", "revolve among the stars"

She came from a time where time is running slow Transcending the limits, step up to the flow She brought to the table the wonders of life The year of the dragon, she opened our eyes.

In time our heart will open, you'll let her in To see we are one, this one that we are In time your eyes will open, time will tell "Larger than life", "revolve among stars"

Part 2

Getting up in the early morning
Getting all my thins together
I'm leaving today
Gonna make my breakfast tea
Gonna feed the birds and fishes
I'm sailing away
I may be a stray dog, mama, but my mind is as clear as ever
I'm as free as a...FISH!!

I will get out in the open, I'll find a place in the summer

On mountains undone

I'm up for the wheels of wonder, I'm in for the cosmic drive

It's great being alive

I may be a baby elephant, step back or I'll step on your toes...

I'll be the atomic juggler, I'll pull up a missile up your nose... $\,$

Won't take a bite of your cake
Won't play with your baby snakes
I'll find my way out, thanks
Won't swim in your money pool
Won't be the domestic fool
I'm cool with NO rule
I may be the fuzzy dice but I won't burn my fingers
twice...
I may be the 7th wonder, wake up!! Don't put me on ice...
