

Human Nature

The Format

Cannot help conflating
Peace with meditation
Not that you would change
I don't want to believe anymore

I fell asleep with the lie
Woke up beside a ghost
You're burning candles inside
Why are you trying to hide the window?

A song that I didn't like
Plays on the radio
They still take credit
That's fine
Long as they leave me alone

I thought that it was human nature
The way the story goes
You ask if I still love you
But I don't wanna fight anymore
I guess it's best we spend some time alone

I watched the sages go dry
As soon as you bought marigolds
But all of the flowers are wild
On my side of the road

A song that I didn't write
Dies on the radio
None of the credit is mine
Feels nice to be left alone

I thought that it was human nature
The way the story goes
You ask if I still love you
But I don't wanna fight anymore

I thought that human nature was
The way the story goes
You ask if I still love you
No, I don't
I guess it's best we spend some time alone

Cannot help conflating
Peace with meditation
Not that you would change
I don't want to believe anymore

Sit and close your eyes
While every day is a genocide
Go and live your life

I don't want to believe
No, I don't want to believe
I just don't want to believe anymore
