

Borderline

The Franklin Electric

You could feel it a it you worried less
You said you'd never let it slow you down
When you seen it all you passed the test
It isn't everything its cut out to be by the fire we must confess
I let you take it all but you wanted less
Turns out now it's a mess
You said love was easy but you never really tried
If I had known that you're never what you thought you'd be

A penny for your thoughts to see
Tell me what it's gonna be on the borderline, on the borderline
Cause I feel like this is over I feel like we are lost here
On the borderline on the border line

Would you follow
Or would you listen to the warning signs
Would you call on your people
There isn't anything to worry about
Some things are gonna take their time
But you're alone and I know you never thought you'd be

A penny for your thoughts to see
Tell me what it's gonna be on the borderline, on the borderline
Cause I feel like this over I feel like we are lost here
On the borderline on the borderline

You could set it aside
The things that you hold
It'll never be the same
And from that you became
And your memory's slipping away
So you put your feelings aside
You know we all can't get away
For the free ride only certain of us escape

If I had a penny for your thoughts to see
Tell me what it's gonna be on the borderline, on the borderline
Can you tell me if it's over I feel like we are lost here
On the borderline, on the borderline
If I had a penny for your thoughts to see
Tell me what it's gonna be on the borderline
