Broken Brain

The Frights

I'll be alright, staying with you
It'll take some time, to save me
You'll kill the pain, with all that you do
My broken brain, baby

I had a problem, I didn't like it
Now I know exactly who I am
You try to talk, you try to change
You finally learn to understand
I need the buzz, I hate the taste
Can't let this Xanax go to waste
I'll give it up, five bucks for two
Is that enough to get you through?

I'll be alright, staying with you
It'll take some time, to save me
You'll kill the pain, with all that you do
My broken brain, baby

I never thought that I was weak
'Til I was too afraid to speak
I had a lump inside my chest
I pulled it out, I did my best
Tried to tell me love won't heal
But they don't know how real love feels
They couldn't see it, they wasn't there
I had to look, I had to care

I'll be alright, staying with you
It'll take some time, to save me

I made it through, I'm still alive
Nothing's gonna break me down, you know I will survive
I got tired of saying that I'm fine

I'll be alright, staying with you
It'll take some time, to save me
You'll kill the pain, with all that you do
My broken brain, baby

I'll be alright, staying with you
It'll take some time, to save me
You'll kill the pain, with all that you do
My broken brain, baby

My broken brain, baby
My broken brain, baby
My broken brain, baby
My broken brain, baby
