

Make Way

The Front Bottoms

I make way through the expensive things on the bed
Don't wanna know what I'd have said
If they put me on the spot right there and then
I make way through the expensive things in my head
Don't wanna know what I'd have said
If they put me on the spot right there and then

Nobody is getting caught
Nobody is bound to know
How truly who we are is never gonna show
I ask a question I should wait for an answer
But I'm a little bit concerned with the time it'll take
I did a front flip getting out of the car
Like my leash was wrapped around the emergency brake and there are

Motives go with it
Possibly alternative
For sure what's yours
Tell me now like it was everything I'm waiting for
Waiting for

I make way through the expensive things on the bed
Don't wanna know what I'd have said
If they put me on the spot right there and then
I make way through the expensive things in my head
Don't wanna know what I'd have said
If they put me on the spot right there and then

Nobody understands
Who I truly am
It's like I'm wearing a mask
But you could still see my face
Okay we get it we've seen the ad a hundred times
Guess you were listening as I was telling all my lies
Got you believing even fooled myself a couple times
My name is Steven but that doesn't make it right

Motives go with it
Possibly alternative
For sure what's yours
Tell me now like it was everything I'm waiting for
Waiting for

Oh you broke my heart getting in your car
I was thinking maybe you would ride with me
Cause we're both going to the same place
Just at very different speeds
I drive too fast too fast it's crazy
Too fast you can't believe
Like there's something that's calling me
From far away it will not let me be
No it will not let me be

I make way through the expensive things in my head
Don't wanna know what you'd have said
If they put you on the spot right there and then
I make way through the expensive things in my head

Don't wanna know what I'd have said
If they put me on the spot right there and then

I make way, I make way
I make way, I make way
I make way, I make way
I make way, I make way
I make way, I make way
I make way, I make way

Don't wanna know what I'd have said
If they put you on the spot right there and then
