## **Stay Gone**

## The Get Up Kids

I'll fawn over photographs That you never would get to see Swallow your own neglect With your miserable company

Your daughter forgot her memories Your daughter forgot her Remember these

I'm over the precedent Of a false security No matter how I come back You can never be proud of me

It's too long to stay gone It's too long to stay gone

I don't regret what words were said-Deserved respect you never had Watching the world keep falling around you I don't expect your hand in this Under duress and influence Watching the world keep falling around you

I'll fawn over photographs That you never would get to see No matter how I come back You can never be proud of me

It's too long to stay gone It's too long to stay gone

I don't regret what words were said-Deserved respect you never had Watching the world keep falling around you I don't expect your hand in this Under duress and influence Watching the world keep falling around you

(around you, around you)
I don't regret what words were said
Deserved respect you never had
Watching the world keep falling around you
