

One Choice

The Ghost Inside

The future in front of me isn't paved with gold
In search of stability, down an unknown road
They say you're going nowhere if you're not ready to go
There's nothing left for me here so now I go it alone

It's all in my head singing over and over
Right or wrong, I know I just need closure

I won't bend, I won't break through the darkest of days
I remember - I survive, I don't surrender
I won't bend, I won't break through the darkest of days
I remember - I survive, I don't surrender
I survive I don't surrender

There's a rose in the soil where the weeds just grow
There's a light in the darkness when the sun won't show

It's all in my head singing over and over
Right or wrong, I know I just need closure

I won't bend, I won't break through the darkest of days
I remember - I survive, I don't surrender
I won't bend, I won't break through the darkest of days
I remember - I survive, I don't surrender
I survive I don't surrender
Scream at the sky "won't you set me free?"
Spit in the face of my destiny
You're not alive if you don't break free
One chance, one choice - It starts with me

Scream at the sky "won't you set me free?"
Spit in the face of my destiny
You're not alive if you don't break free
One chance, one choice - It starts with me

I won't bend, I won't break through the darkest of days
I remember - I survive, I don't surrender
I won't bend, I won't break through the darkest of days
I remember - I survive, I don't surrender
I survive, I don't surrender
I survive, I don't surrender
