Wash It Away

The Ghost Inside

I lay awake trapped in the same routine, repeating over and ove
r
I look ahead and I start to feel the dread of growing older and
 older
So, what's it gonna take to finally make a change?
I'm shaking like an earthquake

It's been building up and become too much
Like the pouring rain, we can wash it away
When you've had enough and it starts to flood
We can break like a tidal wave and wash it away

I hear the wind
A storm is moving in, it's getting closer and closer
For all these days I've been my own barricade, I'm not afraid a
nymore
So, watch me break at the shore

It's been building up and become too much
Like the pouring rain, we can wash it away
When you've had enough and it starts to flood
We can break like a tidal wave and wash it away

So, let it wash away!
So sick and tired of waiting!
Won't stop till I'm bleeding! Break at the shore!
You gotta wash it away!
So sick and tired of waiting! Won't stop till I'm bleeding!

It's been building up and become too much
Like the pouring rain, we can wash it away

When you've had enough and it starts to flood
We can break like a tidal wave and wash it away!
(We can wash it away)
We can break like a tidal wave and wash it away!
