

I Will Destroy The Void In You

The Glorious Sons

Oh the time breaks down and we don't get to break through
Just one shock wakes us up and the other one kills you
We don't have a choice, there is not a choice, but I will help
you choose
I will destroy the void in you

If you close your eyes and drive will the road lead you?
Does the future look just like you staring into your rearview?
You are not a lie, this is not a lie, I will find the proof
I will destroy the void in you
I will destroy the void in you

I can feel your heartbeat in a little vein on your wrist
In the cracks of your iris I have seen a broken mist
I have seen you as a killer, I've put on your mask
I've cut you into pieces and I have put them back
No matter what you do

I will destroy the void in you
I will destroy the void in you
I would break every notion to destroy the void in you
I would undermine the world to destroy the void in you
