

# Lightning

## The Glorious Sons

You know the night is our addiction  
It feels right in the blaze of the stars  
And that's cause we spend too much time thinking  
Looking to find a place better than where we are

They got a red flag for the beast in me  
And they're feeding fire that burns beneath my feet  
I'll let it burn

Wake up  
Come on and catch a little lightning  
There's darker places than this  
There's darker places than this  
Wake up  
Come on can't you hear the thunder  
There's darker places than this  
There's darker places than this

If they're right  
You know the satisfying burn  
Of the fear we all grew to learn  
And we wait for something, anything to happen at all  
Oh we wait for something, anything to happen at all

Wake up  
Come on and catch a little lightning  
There's darker places than this  
There's darker places than this  
Wake up  
Come on can't you hear the thunder  
There's darker places than this  
There's darker places than this

And we wait for something, anything to happen at all  
Oh we wait for something, anything to happen at all

They got a red flag for the beast in me  
And they're feeding fire that burns beneath my feet  
I'll let it burn

Wake up  
Come on and catch a little lightning  
There's darker places than this  
There's darker places than this  
Wake up  
Come on can't you hear the thunder  
There's darker places than this  
There's darker places than this  
There's darker places than this  
There's darker places than this
