

One Word

The Grass Roots

Sometimes silence says it all
And words left hangin' never fall
You could turn my night into day
You could say

One word and we could be
Together like we ought to be
If only you would come to me and say
One word would bring you near
And, girl, I'm livin' just to hear
One word

Somethin's standin', girl, between us
But it's only in your mind
If you look into your heart
You could find

One word and we could be
Together like we ought to be
If only you would come to me and say
One word would bring you near
And, girl, I'm livin' just to hear
One word, one word, one word, one word...

One word and we could be
Together like we ought to be
If only you would come to me and say
One word would bring you near
And, girl, I'm livin' just to hear
One word

One word and we could be
Together like we ought to be...
