

Over & Over

The Gray Havens

There's a song that you played I remember
Can't get it out of my head
And I've played it over and over
And over and over again

Heart of my own heart
Oh, why'd you have to go away
All of me was for you
I just wish you'd stayed
And I just wish we were together at my house
That day

So meet me again in the summer
Meet me again past the sea
Where we can both sing together
That's where I wanna be

Heart of my own heart oh
Why'd you have to go away
All of me was for you
And I just wish you'd stayed
I just wish we were together at my house today

There is a promise I cling to
It's all that I have left
That the darkness that took you can't finally win
If the last to die is death

And one day we will finally see
Everything made right
We will rise again and find
A song that never dies
And we'll sing it over and over
We'll sing it over and over
We'll sing it over and over and over again
