

See You Again

The Gray Havens

It's got
My name on a stone
Written down
Darling, it's the same
It's where I'm livin' now

Yeah, we always knew that today would come
'Cause all we had was a spark
But one day soon, when the sparks all bloomed
And they're chasing back the dark

Gonna see you again
On the gold streets
Standing next to me, I know
I'm gonna see you again
Darling, won't be long
Till every trace of trouble is gone
We'll be together

And I'm not sure what that means
But I know it'll be better than we ever dreamed
When I see you again

So we wait
For now
Till the day has arrived
When we meet
Once more
Then I'll say
Something like...

I always knew you could be like this
I saw flashes and glimpses before
But they fade, they seem like a distant dream
When you walk into the door

When I see you again
On the gold streets
Standing next to me, I know
I'm gonna see you again
Darling, won't be long
'Til every trace of trouble is gone
We'll be together

And I'm not sure what that means
But I know it'll be better than we ever dreamed

Leave behind
So much left to say
We'll have time
'Cause with forever there's another day
Leave behind
So much left to say
We'll have time
'Cause with forever there's another day

When I see you again

On the gold streets
Standing next to me, I know
I'm gonna see you again
Darling, won't be long
'Til every trace of trouble is gone
We'll be together

And I'm not sure what that means
But I know it'll be better than we ever dreamed
We'll be together
And I'm not sure what that means
But I know it'll be better than we ever dreamed
When I see you again

When I see you again
(When I see you again)
And we always knew that today would come
'Cause all we had was a spark
(I'm gonna see you again)
