

# The Forgotten Lake

The Handsome Family

Come with me to the forgotten lake  
Where covered wagons and the wings of missing planes  
Float between black fish underneath the velvet waves  
Strange lights fly across the rocky beach  
Girls in white nightgowns wander barefoot in their sleep  
And the vapors of dreams winding circles round their feet  
Down down float them down  
Let the waters float them down  
To where they'll remember everything

Golden flash at the corner of your eye  
Though shadows that climb your darkened walls at night  
They open a door lit with forgotten light  
In dark water, the grey veil falls away  
We'll see with closed eyes and drift softly in the rain  
Like dragonflies in love, we'll dance across the silver waves  
Down down float us down  
Let the waters float us down  
To where we'll remember everything
