

# Damage

The Haunt

I got new medicine  
Vein up, let's take a swim  
Don't need a catalyst  
Sit back and settle in  
Hold it under your skin

I can take the damage, you can test your luck  
I've got that fire and some idle hands that want some blood  
I dare you to move  
I'm excited  
I can take the damage, you can test your luck

Swear that I'll never quit  
Poison, I like the drip  
So fucking delicate  
I got brand new scars on both my wrists

I can take the damage, you can test your luck  
I've got that fire and some idle hands that want some blood  
I dare you to move  
I'm excited  
I can take the damage, you can test your luck

Underneath  
All your energy  
I can see your scared and it's hard to breathe  
Don't fucking look at me  
You're somewhere in between  
Cutting all these ties and choking on your lies

I can take the damage  
I can take the damage, you can test your luck  
I can take the damage  
I can take the damage, you can test your luck

I can take the damage, you can test your luck  
I've got that fire and some idle hands that want some blood  
I dare you to move  
I'm excited  
I can take the damage, you can test your luck
