

# Wish You Stayed

The Haunt

I've been away for a while  
Your heart was always my home  
Thought I'd never have to let you go  
But here I am now and I'm sitting alone

Came back around and my hometown's broken  
Here on the ground, there's a love that's frozen  
When the words left your mouth, you were set in motion...

I wish you fucking stayed

I left my life behind  
No city, place, day, and time  
Thought it was clear that you were mine  
And now everywhere I look I see the signs

Came back around and my hometown's broken  
Here on the ground, there's a love that's frozen  
When the words left your mouth, you were set in motion...

I wish you fucking stayed

Came back around and my hometown's broken  
Here on the ground, there's a love that's frozen  
When the words left your mouth, you were set in motion...

I wish you fucking stayed

I came back to see  
Nothing's like it used to be  
All that's left is you and me  
The rest is history

Came back around and my hometown's broken  
Here on the ground, there's a love that's frozen  
When the words left your mouth, you were set in motion...

I wish you would've stayed

I wish you fucking stayed
