

Brute Force

The Haunted

Destroy...

Everyone who said you're useless
These words won't seem to exit my mind
I'm that needle in a haystack
I'm pretty sure you wish you never found

You made your move, so will I
Let me show you how we make this work
You draw the line, I rub it out
Erasing the scorn, and your foolish pride

With brute force

Eliminating fear
Eliminating doubt
You took one step, I took one too

You made your move, so will I
Let me show you how we make this work
You draw the line, I rub it out
Erasing the scorn, and your foolish pride

With brute force

Let me ease my tensions
Words screaming in my head
Should I kill myself?
Or everyone else around me?

Eliminating fear
Eliminating doubt
You took one step, I took one too

You made your move, so will I
Let me show you how we make this work
You draw the line, I rub it out
Erasing the scorn, with brute force
