

The Medication

The Haunted

I'm sick.
I can see it now
clear as daylight
So fucking what?
Keep your opinions and leave me out
Paint it red
burn the bitch
Let her serve herself
The pain is real
it's all true I was there

Going insane's overrated
I was right all along
You're all the monsters
I am the normal one
So here I am and yes
I'm fine fucking fabulous alright
(Somehow) I'll make it out alive
no matter how...

The medication knocks the edge right off
and every step away
from feeling this is beauty in its own right
The sidetracks
and your skilled manipulation of my senses
left me down - but I've been down before...

Pigs are a noble creature
compared to scum like you,
but I'm certain there's
one out there left to chew

The medication knocks the edge right off
and every step away
from feeling this is beauty in its own right
The sidetracks
and your skilled manipulation of my senses
left me down - but I've been down before...

Ain't nothing you could say -
Ain't nothing you could do
Ain't nothing there at all for you
Suppose I could make you see
Would it make a change?
Well, come inside and burn

The medication knocks the edge right off
and every step away
from feeling this is beauty in its own right
The sidetracks
and your skilled manipulation of my senses
left me down - but I've been down before...
