Beautiful Coffins

The Higher

On the walls of my apartment
Hang the pictures of all our problems
And the nails I see hammered through me are my therapy

And how did everything go so wrong?
And I'm stuck here left just holding on
To the misery you left for me but now i see

You should go if you want to leave
I know when your six feet deep
You'll be saying your sorry so ill make it easy

I'll pick out the most beautiful coffin for you
To send you on your way
And I'll douse it with gasoline
To make sure when you leave this place that
You leave it up in flames
When the smoke fills your lungs
And your body starts to decay oh
And you blend into the earth
I hope it hurts i hope it hurts you
Like you hurt me first

You have everything you needed
But you walked around so jaded
With a heart as hard as pavement
Bleeds through cracks unseen

But you should go if you want to leave
I know when your six feet deep
You'll be saying your sorry so I'll make it easy

I'll pick out the most beautiful coffin for you
To send you on your way
And I'll douse it with gasoline
To make sure when you leave this place that
You leave it up in flames
When the smoke fills your lungs
And your body starts to decay oh
And you blend into the earth
I hope it hurts i hope it hurts you
Like you hurt me first

Maybe eventually when your finally deceased
Death will feel natural
Then you'll see
All your biblic dreams wont become reality
Because they're out of your league

I'll pick out the most beautiful coffin for you
To send you on your way
And I'll douse it with gasoline
To make sure when you leave this place that
You leave it up in flames
And when the smoke fills your lungs
And your body starts to decay oh
And you blend into the earth

I hope it hurts i hope it hurts you
Like you hurt me first

Oh you hurt me first
You hurt me first
Oh no
