

# Waits Too Long

The Hives

Waits too long  
Waits too long  
And the waits too long  
Waits too long  
And the waits too long  
Waits too long  
And the waits too long

Car bumper, these legs of mine  
Impact so hard, it sent me flying  
I took a beating, but not to worry  
I hold on for me and you

You had true eyes, they shone so bright  
We planned a future this magic night  
I followed you, every wink of your eye  
I followed you to a street nearby

Busted kneecaps and siren song  
This wait of mine - much too long

Waits too long  
And the waits too long  
Waits too long  
And the waits too long  
Waits too long  
And the waits too long

Four bleeding wounds for you to see  
My beaten body, now they messed me up so thoroughly  
You say 'I'll find help because that's how good my heart is'  
There's a future for me and you

So what's certain is there's a railway bridge above  
I wait right here for you, my love  
Without a wallet, with a question so tricky  
Why'd you drive off smiling with the man who attacked me?

Busted kneecaps and siren song  
This wait of mine - much too long

Waits too long  
And the waits too long  
Waits too long  
And the waits too long  
Waits too long  
And the waits too long

Busted kneecaps and siren song  
Can't say I feel much too strong  
And I can't keep my mind off of thinking

This wait's to heaven  
And the waits too long

Waits too long  
And the waits too long

Waits too long  
And the waits too long  
Waits too long  
And the waits too long  
Waits too long  
And the waits too long  
Waits too long  
And the waits too long  
Waits too long  
And the waits too long  
Waits too long  
And the waits too long  
Waits too long  
And the waits too long  
Waits too long  
And the waits too long
