

When The Stars Start To Shine

The Human League

Keep on moving don't back down
Hold your head up hold your ground
Keep on moving 'cause soon the moon is rising
Hold your head up we see a new horizon
Never falter there's many hours 'til morning
Forward forward and we should see the dawning

It's been a lovely day don't throw the night away
That's when the stars start to shine

Never falter lead the pack
Forward forward don't look back

Never falter there's many hours 'til morning
Forward forward and we should see the dawning
Keep on moving 'cause soon the moon is rising
Hold your head up we see a new horizon

It's been a lovely day don't throw the night away
That's when the stars start to shine

It's been a lovely day don't throw the night away
That's when the stars start to shine

Keep on moving don't back down hold your head up
Hold your ground never falter lead the pack
Forward forward don't look back

It's been a lovely day don't throw the night away
That's when the stars start to shine
It's been a lovely day don't throw the night away
That's when the stars start that's when the stars start
That's when the stars start to shine
To shine to shine to shine
