

## See How Far You've Come

### The Infamous Stringdusters

When you're rolling down the highway  
And you've got no time to lose  
All you do is look on down the line  
You may ride through some shadow  
From the mountains to the sea  
Without counting what you've left behind

You won't always notice  
Miles roll by as you roam  
There's time for looking back  
To see how far you've come

What is gone can be forgotten  
What is past can be denied  
When it's out of sight it's out of mind  
What you'll be is where you're going  
What you are is what you've learned  
Watch the world around you as you climb

You won't always notice  
Miles roll by as you roam  
There's time for looking back  
To see how far you've come  
You won't always notice  
Miles roll by as you roam  
There's time for looking back  
To see how far you've come  
To see how far you've come
