

Still The One

The Infamous Stringdusters

When I was young when I was brave
You took my hand and I took your name
Together we walked
Into the night
Side by side
Under the moonlight

I had my doubts
You had them too
Pushed them aside
That's what people do
Things that we did yeah things left undone
You're still with me
And you're still the one

Sometimes the rain starts falling
No way to slow them down
Sometimes I hear you calling
Even though you're not around

Comes from within comes from above
Whatever it is it's all about love
We can't be far from where we began
Can't be too far from where it will end

Sometimes the rain starts falling
No way to slow them down
Sometimes I hear you calling
Even though you're not around

When I was young when I was brave
You took my hand and I took your name
Things that we did things left undone
You're still with me
And you're still the one
