

Truth and Love

The Infamous Stringdusters

In step with time, a candle burns
Smoke goes up, the table turns
Faces glow and light the dark
Like a flash of fire from a spark
The wind is calm, the river moves
In the trees, the leaves are renewed
Blossoms peak from underground
With the hope that light will be found

Seek the truth, find your love
Look up high, aim above
On the run may we go
Let the light shine from your soul

When skies get dark, what have you done?
What have you lost? What have you won?
Did you stand? Did you defend?
Did you give all your love until the end?

Seek the truth, find your love
Look up high, aim above
On the run may we go
Let the light shine from your soul

Time won't stand still
Never has my friends
Times may get hard
Find what's true in your soul
Live a good life 'til the end

Seek the truth, find your love
Look up high, aim above
On the run may we go
Let the light shine from your soul
Seek the truth, find your love
Look up high, aim above
On the run may we go
Let the light shine from your soul
