When the Night Comes Around

The Infamous Stringdusters

I don't know how you got inside my heart
You're kinda crazy but I knew that from the start
I gotta go before this gets too deep
I'm kinda tired but you just won't let me sleep

I think I need a little fun
I'm looking for the setting sun

The night can't come fast enough for me
Life can move too fast to see
And tonight I'll be casting off, the chains that keep me
to the ground
Everything's gonna be alright when the night comes around

I gotta call my friend and talk this through
Ah what's the point I can't make sense of you
I'm goin out I just might see the dawn
I'm gonna rage it until your memory's gone

The night can't come fast enough for me
Life can move too fast to see
And tonight I'll be casting off, the chains that keep me
to the ground
Everything's gonna be alright when the night comes around
