

Don't Believe Everything You Dream

The Ink Spots

Don't believe everything you dream
Your imagination may be too extreme
If you should ever dream that I could love another
Just let it go in one dream and out the other

Don't believe everything you see
If you dream that someone's making love to me
Wake right up and count to ten
And never dream that dream again
Don't believe everything you dream
Darling, just believe in me

Don't believe everything you dream
Your imagination may be too extreme
If you should ever dream that I could love another
Just let it go in one dream and out the other

Don't believe everything you see
If you dream that someone's making love to me
Wake right up and count to ten
And never dream that dream again
Don't believe everything you dream
Darling, just believe in me

Don't believe everything you see
If you dream that someone's making love to me
Wake right up and count to ten
And never dream that dream again
Don't believe everything you dream
Darling, just believe in me
