

Stars that Fall Away from Us

The Innocence Mission

Later on,
stars that fall away from us,
in the car, may be found on the ground,
with many words that have been
blowing around the dark here-
I almost can see them all.

Far away,
looking out for a way back.
Loneliness is a star that we all see.
Mostly we do not shout it out, it's secret.
Almost never at all.

And a million, million,
a million of them all around,
a million, million things unsaid,
unsaid.

Later on, stars that fall away from us,
In the car, may be found on the ground
with many words that have been
blowing around around the dark here-
I almost can see them all.
