

Free Me

The (International) Noise Conspiracy

Reach out your arms and touch me save me now
I can not do it by myself
This time you'll find these wounds open wide
I want you here to help
I need your warmth your blood to bleed with me
To find a place to fit in
To break this hold to make me feel reborn
I wanna hear it tell me where do I begin

Free me and when the morning breaks
All together we'll find a way
Free me and when the morning breaks
Revolutions just a heartbeat away

Stretch out your hand and feel me help me now
Please be my safe haven
I've been searching for a bigger cause
For some hope to take me
Take me through the valleys and the mountains high
Across the rivers so deep
Onto the road we rarely tread upon
So please set me free come walk beside me

Free me and when the morning breaks
All together we'll find a way
Free me and when the morning breaks
Revolutions just a heartbeat away

So what are we waiting for
Revolutions just a heartbeat away

Come save come save come save me now

Free me and when the morning breaks
All together we'll find a way
Free me and when the morning breaks
Revolutions just a heartbeat away
