## The Internet

You just a girl I came to know  
I thought you were a ladybug  
You ask me out, ok for sure  
I make myself available  
You say, "Ok, then it's a date"  
I say I'll pick you up at 8  
We take the fancy car valet  
I'll wine and dine ya untill it's time, girl

The conversation is a must  
You look amazing, that's a plus  
My crib is close, I just cleaned up  
I text my bros, they wish me luck (Ay)  
Stop for a bottle on the way  
Twist up the trees that's on the tray  
Put my intentions on display  
Right now, I want you, can I get closer?

I compliment you on the nice You wearing something kinda nice too  
I'm trying to get you on the right mood  
Let me get you on the right mood  
If I hit it the right way  
Can I get a night too?  
Let me get you on the right mood  
I could get you on the right mood

Now that I got you all alone  
Let's crack the (?), let's have a toast  
Please have a seat, get comfortable  
I'll try not to fuck up the flow (Nah)  
Right where I want you  
I'll check my posture, come at you proper, girl  
Something about you  
I'm on a cloud now you know my heartbeat like

You feel it right?

(Hey, you feeling good right?)  
Baby, next time I'll bring you flowers  
Roses, exotic daisies  
Next time I'll take you out  
Girl, don't you keep me waiting  
Next time I'll bring you flowers
