

## Divide Us

### The Interrupters

Same tricks they used before  
They're trying to divide us  
But that'll only multiply us  
Same tricks they used before  
They're trying to divide us  
But that'll only multiply us

Sufferation, intimidation, brainwashing the new generation  
They use violence, they are tyrants, they make laws and they expect silence  
But not us, we got the beat, and when the guns smoke they feel the heat  
So take action, they're not at your front door, listen up one, two, three, four!

Same tricks they used before  
They're trying to divide us  
But that'll only multiply us  
Same tricks they used before  
They're trying to divide us  
But that'll only multiply us

Depression, aggression, we're united against the oppression  
They use Marshall law, we got a sharp claw and we attack like the lion of Judah  
And when we're done, you'll feel the roar, from the people you can longer ignore  
So take action, they're at your front door, listen up one, two, three four!

Same tricks they used before  
They're trying to divide us  
But that'll only multiply us  
Same tricks they used before  
They're trying to divide us  
But that'll only multiply us

Same tricks they used before  
They're trying to divide us  
But that'll only multiply us  
Same tricks they used before  
They're trying to divide us  
But that'll only multiply us
