

Liberty

The Interrupters

Drones in the sky
Government lies
Keeping an eye out
Tell me why they violate rights
Blue and red lights
Billy club fights on my street at night

Where did my liberty go?
Where did my liberty go?
Now they're taking over and they got complete control
Where did my liberty go?

Poverty's high
Barely get by
They want you to suffer before you die
There's no moving up
Too many mouths to feed
Take all they want from the ones who need

Where did my liberty go?
Where did my liberty go?
Now they're taking over and they got complete control
Where did my liberty go?

Better quiet down
Don't speak your mind
Nod your head like everything's fine
Don't verbalize it
Cause if they hear you
They'll hunt you down and disappear you

Where did my liberty go?
Where did my liberty go?
They took it away, they got complete control
Where did my liberty go?

Drones in the sky
Government lies
Keeping an eye out
Tell me why they violate rights
Blue and red lights
Billy club fights on my street at night

Where did my liberty go?
Where did my liberty go?
Now they're taking over and they got complete control
Where did my liberty go?
