

White Noise

The Interrupters

White noise white noise white noise
All you are is white noise to me
To me to me to me
All you are is white noise to me

I won't listen, static in the ear
Got my ear drums wishing
They couldn't even hear
You tell me lies, but I see right through it
You've done a lot of dirty work
And I can straight prove it

White noise!
I'm tuning out, manipulation sounds
You got my information
But I'm living underground
My friends don't wanna hear it
Cause they are on the level
They got a lot of spirit
And they know you are the devil

White noise white noise white noise
All you are is white noise to me
To me to me to me
All you are is white noise to me

I won't speak, talking over static
White noise white noise, response automatic
And I've had it, with your volume
I'm in a panic with the music in the room
White Noise

Get the rude boys boppin' their heads in sync
Get the girls on the dancefloor
Skankin' to the beat
We're drowning out the voice
That they call authority
We're interrupting the majority

White noise white noise white noise
All you are is white noise to me
To me to me to me
All you are is white noise to me

Turn the dial, and listen for a while
We take another frequency for miles and miles
So, turn the dial, and listen for a while
We take another frequency for miles and miles

White noise white noise white noise
All you are is white noise to me
To me to me to me
All you are is white noise to me

I won't listen, static in the ear (to me)
Got my ear drums wishing, they couldn't even hear (to me)
They tell me lies but I see right through it

All you are is white noise to me
