

# Energy Of Love

The Intruders

I read in the newspaper there's an energy crisis  
They need gas to run the cars  
They say they need oil  
To take the spaceships to mars  
(But listen here)  
But, oh, they forgot  
That most important thing  
The power that surrounds the universe  
That brings winter, bring fall and bring spring

Where's that energy of love?  
Where can we find that power?  
Where's that energy of love?  
Where can we find, find that power?  
Power of love  
Yeah, baby  
Power of love

They say they need so many things  
To run the big machines  
But I wanna know how much joy  
How much happiness will it all bring  
Such a high cost to be living  
Each and everybody's got to pay  
But we're so busy we forgot  
The force that separates the night from day

Where's that energy of love?  
Where can we find that power?  
Where's that energy of love?  
Where can we find, find  
Yeah, find the power of love?  
You know we need it  
Find the power of love

Where's that energy? (Where's that energy of love?)  
Hey baby, where can we find, find that power? (Find that power)  
We need it, we want it  
Where's it at, baby? (Energy of love)  
Where can find, find that power? (Find that power, that power of love)  
That power of love  
Where's that energy? (The power of love)  
Where's that energy?  
Energy of love, love, love, love (Energy of love)  
Where can we find, find that power? (Find that power)  
Where? Tell me, I wanna know (Energy of love?)  
I wanna know  
Where can we find, find that power of love? (Find that power, that power of love)  
Baby, power of love  
Oh, where, where, where, where, where, where? (Energy of love)  
Where can I find it?  
Tell me, baby, tell me, baby, where's that energy?
