

The Void

The Kills

I'm flying too close to the sun
Is this where the earthquakes come from
Walked on with helium legs
Weigh yourself - see what you've done

Every looker keeps you looking
No one ever told me there'd be scenes like this
Cruising through the cars, now will you
What will you fly over us next?

Been 'round, I seen the mess
Saluted no real place
There's nothing here for you to know
Beauty in the belly of zero

Every looker keeps you looking
Back and forth, the lights are pacing
Cruising through the cars now, how will you
No one ever told me there'd be scenes like this
Every looker keeps you looking
Cruising through the cars now, how will you
What will you fly over us next?
No one ever told me there'd be scenes like this

What's it taste like?
What's it taste like now?
What's it taste like?
What's it taste like now?

Every looker keeps you looking
Cruising through the cars now, how will you
What will you fly over us next?
No one ever told me there'd be scenes like this
What will you fly over us next?
No one ever told me there'd be scenes like this
What will you fly over us next?
No one ever told me there'd be scenes like this
