

# Power to the People

The King Blues

I vote with my feet to the beat of the drum  
A voice from the slum that won't be left dumb  
I won't be discreet on the street where we run  
We just begun, we only just begun

My message is marching and every single time  
I'm taking out the beacons with my protest sign  
Where we draw the line, no following the blind  
Here to stop the decline

Power to the people because the people have the power  
Come on tell me can you hear us, we're getting stronger  
by the hour  
Power to the people

You don't know of the excitement we're feeling  
When just for a moment it feels like we're winning  
A new day dawns to a new beginning  
Giants fall from the stones we're slingin

We break the police line, it's like we reached the  
stars  
Build a barricade out of the over-turned cars  
To our own drum we'll walk our own path  
Our streets, the streets are ours

Power to the people because the people have the power  
Come on tell me can you hear us, we're getting stronger  
by the hour  
Power to the people  
Power to the people

Give power to the people
