

All About Her

The Kite String Tangle

She pulled me in with her silhouette
It danced while she slept
Lights flicker ahead
Another secret kept
And I pray that I could be perfect
But I make my mistakes
I gave her heartache when she gave me the world

And I will let my arms down
It's all about her
I'm going where I will be without her now
It's all about her
In this battle ground
She's all I see, got me on my knees and I surrender peacefully

Daylight fades as the night falls
She let her guard down
Gave me the power to put us both through hell
I stumble and I fall
By now she's thick skinned
I try to let her in, I try to loosen my grip

And I will let my arms down
It's all about her
I'm going where I will be without her now
It's all about her
In this battle ground
She's all I see, got me on my knees and I surrender peacefully

And I will let my arms down
It's all about her
I'm going where I will be without her now
It's all about her
In this battle ground
She's all I see, got me on my knees and I surrender peacefully
