

Illuminate

The Kite String Tangle

As the words fade away
I still believe what your eyes say
(Fall into your arms)
I still see you illuminate
As I drop my guard
(Fall into your arms)

The first day at the gallery
Didn't think I'd ever know where your body ends
(Fall into your arms)
Time slows for the last breath
While everything is shattering
(Fall into your arms)

Everything is shattering
(Fall into your arms)
Start telling me you'll meet me there
(Fall into your arms)
(Fall into your arms)

We won't make it keeping to our own
(I know it's not easy)
Through the long shadow you can't see the road
(I know it's not easy)
So stop fearing you won't be the one
Can you just let us grow?
You won't let us grow
Is that so hard?

We won't make it keeping to our own
(I know it's not easy)
Through the long shadow you can't see the road
(I know it's not easy)
So stop fearing you won't be the one
Can you just let us grow?
You won't let us grow
Is that so hard?
