

## KILLING TIME

### The Kite String Tangle

Lay low and blame it on the weather  
Shut in where I can't feel the pressure  
Heavy on my shoulder, we get older  
I get lighter with you

The plans we made are futile these days  
Passing by like cars on highways  
Heavy on my shoulder, we get older  
I get lighter with you

Temporary medication with you killing time  
Never felt like hours wasted, we're just killing time  
Temporary medication with you killing time  
Never felt like hours wasted, we're just killing time  
I get lighter with you...

All night staring at the ceiling  
Stayed up so I could watch you sleeping  
Simple satisfaction this attraction  
I get higher with you

Guess I should get my shit together  
But I'd rather do nothing with ya  
Simple satisfaction this attraction  
I get higher with you

Temporary medication with you killing time  
Never felt like hours wasted, we're just killing time  
Temporary medication with you killing time  
Never felt like I was wasted, we're just killing time  
I get lighter with you...

Temporary medication with you killing time  
Never felt like hours wasted, we're just killing time  
Temporary medication with you killing time  
Never felt like I was wasted, we're just killing time  
I get lighter with you...
