

The Hundredth Time

The Kite String Tangle

There I was
A vacant body on the floor
The color change is always strange for who I was before
And I was a fool
I had this great plan
I know I've never been a violent man
But love I might be astrange

You said it like I haven't known for years
For the hundredth time, I know you just fell out of love
With fading memories and souvenirs
For the hundredth time, I know you just fell out of love

You were brave
No I don't blame you for everything
I was completely in
I've never been more sure of anything
'Cause I was one as soon as the first flame was there
I watched you take the wick between your fingertips
And choke it

You said it like I haven't known for years
For the hundredth time, I know you just fell out of love
With fading memories and souvenirs
For the hundredth time, I know you just fell out of love

You said it like I haven't known for years
For the hundredth time, I know you just fell out of love
With fading memories and souvenirs
For the hundredth time, I know you just fell out of love
