

# The Mess We're In

## The Kite String Tangle

Come just a little closer  
Stay just a little longer  
Oh, you know I'd stay forever if I could  
You felt the same last night  
Your fingers curled around mine  
When I leave it never feels like it should

As we're getting all the meaning one another more  
Feeling close enough to raise our voices  
Slam the door  
Look at the mess we've made  
Oh look at the mess we're in  
I know we used to make time  
I know that we've let this slip  
There's beauty in total breakdown  
There's life behind each shadow  
It's hard to hear right now  
But I never will let you go

Count the scars in your psyche  
As I press on them lightly  
I see myself in different stories from your past  
And it feels so familiar laying down by the river  
Holding on so tightly as if to make this last

As we're getting all the meaning one another more  
Feeling close enough to raise our voices  
Slam the door  
Look at the mess we've made  
Oh look at the mess we're in  
I know we used to make time  
I know that we've let this slip  
There's beauty in total breakdown  
There's life behind each shadow  
It's hard to hear right now  
But I never will let you go

I never will let you go  
I never will let you go

Look at the mess we've made  
Oh look at the mess we're in  
I know we used to make time  
I know that we've let this slip  
There's beauty in total breakdown  
There's life behind each shadow  
It's hard to hear right now  
But I never will let you go
