

## Is It Medicine

The Knife

No more tears and you'll be fine  
I stay here all night  
And when I've stayed all night  
We go out in the morning light

And then you try to live the day  
I don't know how, but I know what to say  
Is it medicine or social skill  
Don't have the answer and nobody will  
You go screaming on without a word  
Being sad is a fulltime work  
And now the day has come to an end  
And then you start to cry again

Is it medicine?  
Is it medicine, is it medicine or social skill?  
Is it medicine, is it medicine, is it medicine or social skill?
