

## Brightside

The Knocks

Sing it with me one more time

We've been working overtime  
Looking for the active life  
But something's got you feeling fine  
This melody's been on your mind

Sing it with me one more time  
And we all wanna make it to the bright side  
So come on, and sing it with me one more time  
And we all wanna make it to the bright side  
So come on, and sing it with me one more time

In darkness we have found a light  
Through danger zones and fearless flights  
Trying to go with no end in sight  
A melody that makes it right

Sing it with me one more time

And we all wanna make it to the bright side  
So come on and sing it with me one more time
