

New To Me

The Lemon Twigs

When I go to sleep
Please be there
Keeping her body warm
If I fall too deep in despair
Peace will find me

Long 'fore the cradle bids goodnight
Far from the darkness, out of our sight

When your face is new to me
The way it used to be
Don't try and make me see
We can fall in love
Again my eyes are wide, and scared
And you are not prepared
I've always had my cares
Now I've nothing to defend

And when you hear me at night
'Neath the moon and stars' fight
You're only hearing a reflection

And when you hold my hand and you tell me who I am
I'll find my heart's connection

When my mouth is open wide
Like someone cut the lights
I flicker from your sight
Past the doorway to the end of struggles big and small
Now I cannot recall
You can let go of them all
And I'll see you soon, my friend

And when you hear me at night
'Neath the moon and stars' fight
You're only hearing a reflection
And when you hold my hand and you tell me who I am
I'll find my heart's connection

When your face is new to me
The way it used to be
Don't try and make me see
We can fall in love again
We can fall in love again
We can fall in love again
